

Open call for a postdoctoral researcher in the field of paleoenvironmental studies

We are pleased to announce an **open call for a fully funded 2-year postdoctoral position** at the Catalan Institute of Classical Archaeology (ICAC).

The successful candidate will join the **HUM-DYNLANDS project**, which aims to reconstruct Holocene cultural landscapes in Spain and Italy, with a particular focus on mountain areas, through a **multi-proxy palaeoecological approach**. The research will involve the **analysis of pollen, non-pollen palynomorphs (NPPs), and microcharcoal**, and will integrate palaeoenvironmental data with archaeological and geoarchaeological evidence. The project seeks to investigate vegetation and landscape changes associated with human activities, especially in high-mountain environments.

Key details:

- Work centre: ICAC, Taragona
- Job title: Job title: I6 Postdoctoral Researcher (R2)
- Duration: approximately 24 months, conditioned by the duration of the allocated budget.
- Type of contract: full-time,
⇒ **Application deadline: 12 June 2026, 11:59 p.m. CET**
